Anatomical planes

Six-question worksheet

Use anatomical position as your reference. Name the plane in questions 1–3. Explain or correct the statement in questions 4–6.

Name _____ Date _____

1. A plane separates anterior from posterior portions. Name it.

2. A plane divides the body into right and left portions but misses the midline. Which specific term fits?

3. A section separates superior and inferior portions. Which plane produced it?

4. “Every sagittal plane is a median plane.” Correct the sentence.

5. A student says “frontal and coronal are different planes.” What should change?

6. Is “vertical plane” enough information to choose between sagittal and coronal?

Print at actual size. Find the separate answer key on the body-planes practice page.
